#  
align.py is the alignment without affine gap  
affine_align.py is the alignment without affine gap  
These are python 3.5 language.  
To run align.py python3 align.py input_file_name  
To run affine_align.py python3 affine_align.py input_file_name gap_open_penalty  
gap_extend_penalty  
The penalties are absolute value.  
Matrix.txt file must be in the same directory. The code read the blosum62 from it.
